

## Did you know that...?

Plants are the **engineers** of dunes; they slow down the wind and trap the sand

Sand dune plants may tolerate hot and dry conditions, but **not human trampling**  
**When we lose plants, we lose dunes**  
**And when we lose dunes, the beach dies out**

- **Follow the signposted routes to get to the beach**, avoid stepping on and damaging the dunes. There are many signposted paths, and you often only need to walk a few more meters.
- **Avoid lying down on the dunes**, just move a few meters away.
- **Take home your rubbish**. Trunks, branches and seaweed are not rubbish, your plastic bottles are!

PIÙ **D**UNA  
BUONA IDEA

**Enjoy the beach**  
**but respect the dunes**

You are inside a **Site** of the **Natura 2000 network**, a Europe wide network of more than 27.500 sites. The aim of the network is to ensure the long-term survival of Europe's most valuable and threatened species and habitats, listed under both the Birds Directive and the Habitats Directive.

The Legislative Decree n. 121 of 7th July 2011 introduced a new article to the **Penal Code regarding environment protection** Art. 733-bis (Destruction or damage of habitats inside protected areas) «Whoever, except in consented cases, destroys, damages or compromises the conservation status of a habitat inside protected areas, is punishable of arrest of up to eighteen months and a fine not less than 3.000 euros»
